

MOHAMMED MUSTAFA EMIRA

ASSOCIATE DEVOPS & BACKEND ENGINEER

28 Nawal Street, Agouza, Giza | +201101009536 | emiradev909@gmail.com | [LinkedIn](#) | [GitHub](#)

Associate DevOps & Backend Engineer with a background in Business Administration (Very Good, Ain Shams University) and a strong transition into the computer science and IT domain. Began professional development with WordPress and web application development, then progressed to backend engineering using Python, C#, and .NET, followed by specialization in DevOps fundamentals including Linux system administration, Docker, Kubernetes (K8s) basics, and CI/CD workflows. Experienced in version control, networking concepts, debugging, and automation-focused practices, with a strong focus on building scalable, reliable systems and continuous technical growth.

EDUCATION

Bachelor of Science in Business Administration

Graduated 2021

Ain Shams University – Cairo, Egypt

Grade: **Very Good**

- Participated in university projects and workshops to develop leadership and teamwork skills
- Completed capstone project integrating business concepts with digital solutions

High School – Horreya Language School

Graduated 2018

- Participated in science and technology clubs
- Organized and contributed to school events and competitions
- Developed early interest in computer applications and problem solving

PROFESSIONAL EXPERIENCE

Freelance – Web developer & Backend Engineer

March 2025 – Present

- Built responsive WordPress websites and custom web applications by developing PHP-based solutions, improving client engagement and streamlining content management workflows.
- Designed and implemented backend features using PHP, C#, and .NET, enabling efficient data handling, business logic, and user interactions.
- Developed RESTful APIs and data-driven backend services, supporting scalable and maintainable application architectures.
- Containerized development environments using Docker and Docker Compose, ensuring consistent deployments across local and client servers and reducing environment-related issues.
- Applied Linux system fundamentals for server management, troubleshooting, and application support, improving reliability and uptime.
- Managed version control using Git and GitHub to track changes, maintain code integrity, and support efficient collaboration.
- Debugged backend and server-side issues using logs, structured error handling, and Linux tools, strengthening application stability.
- Applied clean code principles, maintaining readable, well-structured, and documented codebases.
- Maintained application and deployment metadata through configuration files and version control practices.

Amplify Management – Web Developer

May 2024 – Dec 2024

- Maintained and updated client websites, creating cohesive, user-friendly, and responsive digital experiences.
- Oversaw end-to-end client projects, coordinating tasks, monitoring progress, and ensuring deliverables met deadlines, resulting in timely, high-quality project delivery.
- Applied **Linux system administration** skills, including managing users, permissions, processes, and networking for server environments.
- Built and maintained e-commerce websites using WordPress, integrating custom features and responsive design to enhance engagement and conversion rates.
- Worked with Shopify for basic store setup and customization, extending e-commerce capabilities.
- Implemented SEO best practices and optimized websites for Google bots, improving search engine visibility and driving higher organic traffic.

- Integrated marketing insights into website design and content, aligning web functionality with business goals to improve campaign effectiveness.
- Managed code versioning using Git and GitHub, ensuring smooth team collaboration and reducing deployment errors.

Cool Sandwich – WordPress Developer

January 2024 – October 2024

- Built and maintained WordPress websites for clients, leveraging PHP and theme customization, improving user experience, functionality, and content management.
- Managed hosting environments using cPanel and SSH, applying Linux fundamentals and FTP workflows to ensure efficient deployment and server management.
- Configured SSL certificates and HTTPS, enhancing website security and building client trust.
- Troubleshot server and website issues, including permissions, plugin conflicts, and deployment errors, ensuring site stability and uptime.
- Applied AI-assisted tools for code generation, debugging, and optimization, accelerating development and improving code quality.
- Collaborated with clients to integrate content and marketing strategies, aligning website functionality with business goals and campaign objectives.

Importing and Marketing Egyptian Company (IMEC) – Sales and Marketing Associate

May 2022 – April 2023

- Accelerated sales growth by implementing targeted strategies and tracking marketing leads, resulting in measurable increases in conversion rates and revenue.
- Bridged marketing and sales efforts by aligning lead generation campaigns with sales processes, ensuring smoother handoff and higher lead-to-client conversion.
- Leveraged international experience to understand diverse client needs and market trends, enhancing cross-border sales effectiveness.
- Automated repetitive reporting tasks in Excel, reducing report preparation time by 50%, allowing focus on strategic sales activities.
- Used formulas, pivot tables, and charts in Excel to analyze sales trends and marketing performance, enabling more accurate forecasting and actionable insights.
- Negotiated and closed deals with clients using strong communication and persuasion skills, improving client satisfaction and fostering long-term business relationships.
- Analyzed sales data and campaign performance, identifying opportunities for improvement and implementing actionable strategies to optimize results.

SKILLS

Web & Backend Development

- HTML, CSS, PHP, WordPress, WordPress theme customization
- Backend development: PHP, C#, .NET
- RESTful APIs and data-driven applications
- MySQL / SQL (queries, data retrieval)
- Web application deployment & troubleshooting
- AI-assisted development: code generation, debugging, optimization

DevOps & Infrastructure

- Docker & containerized development environments
- Kubernetes (K8s) for microservices orchestration
- CI/CD pipelines (Jenkins)
- Linux fundamentals: user management, permissions, processes, server troubleshooting
- cPanel & SSH management, FTP workflows, SSL/HTTPS configuration
- Infrastructure & deployment metadata management

Version Control & Collaboration

- Git & GitHub
- Code Review
- Team collaboration / cross-functional teamwork
- Project oversight / end-to-end project management

SEO & Marketing Integration

- SEO best practices & Google Bots optimization
- Aligning web functionality with marketing campaigns

Business & Analytical Skills

- Sales acceleration strategies
- Lead management & negotiation
- International market exposure
- Data analysis for sales performance

CERTIFICATIONS

- Intermediate DevOps Course – CLS Learning Solutions
- Linux System Administration – Udemy (Self-Paced)
- 100 Days of Code™: The Complete Python Pro Bootcamp (Self-Paced)
- CS50: Introduction to Computer Science – Harvard University (Self-Paced)
- Cisco Network Basics – Cisco Academy
- Cisco Packet Tracer – Cisco Academy
- Intermediate MS Office – CLS Learning Solutions
